SDG Smart Hub

AI Classifier Test Document • Sample Community Development Proposal

Purpose of This Document

This sample document is designed to test the SDG Smart Hub administrator's AI-powered document classification feature. It contains realistic community project descriptions related to several Sustainable Development Goals (SDGs). Upload this PDF in the AI Classifier and review the predicted SDG labels and confidence scores, if available.

Project Proposal: Clean and Healthy Barangay Initiative

The barangay plans to organize a monthly cleanup of streets, drainage canals, and the riverbank. Volunteers will collect plastic bottles, sachets, and other waste, while community workers will teach households how to separate biodegradable, recyclable, and residual materials. The project aims to reduce waterway pollution, prevent clogged drainage, and promote responsible consumption and waste management.

Likely related goals for testing: SDG 11 — Sustainable Cities and Communities; SDG 12 — Responsible Consumption and Production; SDG 6 — Clean Water and Sanitation.

Project Proposal: Learning Support for Children

The community learning center will provide free after-school tutoring, school supplies, reading materials, and access to shared computers for children from low-income households. Volunteer teachers will conduct literacy and mathematics sessions and help students develop basic digital skills. The program intends to reduce barriers to learning and improve access to inclusive, quality education.

Likely related goal for testing: SDG 4 — Quality Education.

Project Proposal: Solar Energy for Public Facilities

The barangay proposes installing solar panels and energy-efficient lighting in its community hall and health center. The project will monitor electricity use, train maintenance personnel, and encourage residents to conserve energy. By using renewable energy, the initiative aims to lower operating costs and reduce greenhouse-gas emissions.

Likely related goals for testing: SDG 7 — Affordable and Clean Energy; SDG 13 — Climate Action.

Project Proposal: Community Health and Nutrition

Local health workers will organize vaccination information sessions, maternal-health education, nutrition checks for children, and wellness consultations for older residents. The program will share reliable health information and refer residents to appropriate health services when needed. Its goal is to improve access to preventive care and support healthier lives across the community.

Likely related goal for testing: SDG 3 — Good Health and Well-Being.

Project Proposal: Livelihood and Skills Training

A community livelihood program will offer practical skills workshops, job-readiness sessions, and small-business training for unemployed adults and young people. Participants will learn budgeting, basic entrepreneurship, and how to prepare for employment opportunities. The program aims to expand access to decent work and support sustainable local livelihoods.

Likely related goals for testing: SDG 8 — Decent Work and Economic Growth; SDG 1 — No Poverty.

How to Use This Test File

No.	Test step
1	Open the SDG Smart Hub administrator panel and go to AI Classifier.
2	Upload this PDF and run classification.
3	Check that the system extracts the document text and returns one or more SDG categories.
4	Compare the returned labels with the likely related goals listed under each proposal.
5	If upload fails, check the backend terminal and browser Network tab for the error response.

Note: The suggested SDGs are reference expectations for testing, not guaranteed model outputs. A multi-topic document may reasonably be assigned multiple SDGs depending on the classifier design.
